

Applications

RDO131A10

<b>Application 01</b>	<b>162397_1</b>	Direct boiler-heating circuit Domestic hot water with loading pump; Hot water sensor Burner single stage
<b>Application 02</b>	<b>162397_2</b>	Mixing value-heating circuit (with or without limitation of return temperature) Domestic hot water with loading pump; Hot water sensor Burner single stage
<b>Application 03</b>	<b>162397_3</b>	Mixing value-heating circuit for a floor heating-circuit and a direct heating-circuit (auxiliary-heating circuit) for radiators with thermostat valve connected in series. (Pumps energized with the same relay) Domestic hot water with loading pump; Hot water sensor Burner single stage
<b>Application 04</b>	<b>162397_4</b>	Mixing value-heating circuit (with or without limitation of return temperature) without boiler control Domestic hot water with loading pump; Hot water sensor Burner not controlled by heating controller (by external "fixed value"-control of boiler; i.e. through boiler thermostat)
